

# VISUAL HISTORY OF THE HOLOCAUST

Rethinking Curation  
in the Digital Age

## Workshop Curation of Engagement Levels

Vienna, Austria  
May 20 – 21, 2019

Hosted by

Ludwig Boltzmann Institute  
for Digital History, Vienna

The features of the future Visual History of the Holocaust Media Management and Search Infrastructure (VHH-MMSI) are discussed in this workshop.

The requirements elicitation for the platform created by the VHH project started with a co-creation workshop held as part of the Kick-off Meeting in February 2019. Since then, a VHH-MMSI workgroup at LBI spent several weeks on evaluating, systematizing, and elaborating the feature requests. Meetings were held with the developer teams at MAX and TUW to reach a joint understanding of the requirements. In this two-day workshop, the workgroup responsible for the curatorial framework of the VHH projects meets with developers and other VHH Team Members for an in-depth discussion of the feature requests before they are transformed into user stories by MAX. This workshop is held in German.
