VISUAL HISTORY OF THE HOLOCAUST

Rethinking Curation in the Digital Age

Workshop Vocabularies

Vienna, Austria
November 21 – 22, 2019

Hosted by

Ludwig Boltzmann Institute
for Digital History, Vienna

The aim of this workshop is to present and discuss the basis, structure and content of the VHH Vocabularies to be fully defined in deliverable D4.1 Controlled Vocabularies Specification.

Controlled vocabularies play a key role in the annotation of both audiovisual and non-audiovisual documents to make them findable, explorable, and comparable. In this 1.5 day workshop, VHH Team Members involved in creating and applying controlled vocabularies meet to reach a joint understanding of the metadata standard and schema providing the framework for these controlled vocabularies, of their function in manual and automated text and film analysis, and of the steps still to be taken in the process of creating and consolidating vocabularies. Existing vocabularies to be reused are revisited, newly created vocabularies discussed. The focus of this workshop lies on descriptive vocabularies. As regards analytic vocabularies, an updated draft of the Taxonomy of Relations is presented.
